

SmartPager

Distributed Alarm System

Silence.

From Intensive Care to "Silent Care": Noise exposure in the ICU has a strong impact on patients' well-being as well as an optimal functioning of both nursing and medical staff.

With SmartPager, you are able to avoid unnecessary alarms and keep the room silent and calm, ensuring patient's proper rest and recovery while preserving your workflow efficiency.

Keep the whole ward in your pocket and do not miss critical situations again. Access real-time waveforms and vital signs of multiple patients from both mobile and stationary devices.

On a user-friendly interface, the nursing team easily manage shifts, bed assignments and call for help whenever needed.

- Medical Device Class IIb
- Browser based administration
- Runs on existing infrastructure and standard platforms
- Integration of our monitoring and other bedside devices
